Sub:” Requesting Medical leave due to Tuberculosis treatment”.

Respected Ma'am,

This is to inform you that I have been suffering from chronic pain in chest region due to infection liver, pancreas and stomach ulcers. I have been taking treatment from last 6-7 months. And my health condition keeps deuterating.

Now, I have been detected with Tuberculosis (TB) infection in my stomach and neck (on 10/11/2018). Treatment for TB has started on 19/11/2018 and Dr. Mayank Mehrotra (Regency Kanpur) has said that improvement will be seen within 2 months and treatment will take form 6 month to 9 months. So, hopefully I will be able to join college in January 2019.

Kindly allow me for medical leave for this duration. I have attaching copy of medical advice from my Doctor. I will present medical certificate when I join back.

Thanking you

Yours faithfully
