MNNIT Allahabad

Date: 06/02/18

Sub: **"Intimation for leave"**.

Respected Ma'am,

This is to inform you that I am taking treatment for tuberculosis from 19/11/2018, improvement has been observed but my uric acid level reach very high (on 16/01/2019) due to medication, causing pain and swelling in joints.

Now the uric acid levels are under normal range (on 04/02/2019) but the pain might take 2-4 weeks to subside (according to the doctor).

Please find the attached medical certificate.

Thanking you

Yours faithfully

Prateek Raj Gautam
